## Flix movies app

Our Now Shows section shows all the movies we currently have available for viewing in your area. Simply browse our catalog, select the movie you want to watch, and select the Watch/Play Movies option.2. How are Flix Premieres movies? All our films go through a rigorous screening process to ensure we provide you with a selection of quality films. We have the premiere of new movies exclusively for the Flix Premiere every week, and in many cases these appear for the first time ever in a given area, so we'll always have something you've never seen before.3. Which devices are supported? You can use all promotional free tickets (if applicable) or your subscription to watch movies on the following devices, and switch between devices and continue to look at another device right where you left off by logging into your account:Mac/PC – Latest versions of every major browser are supported, including Safari (mobile &pc computer), Chrome (mobile &pc computer), Firefox, Opera, Microsoft Edge, and Internet Explorer 11+ on Windows 8.1 or later.iPhone/iPad – our install native app from the App Store or just use your mobile browser. Android - Install our original app from the Play Store, or just use your mobile browser. The Smart TV &pc OTT – Flix Premiere app is available on Apple TV, Roku and most Smart TV platforms, including Samsung, LG and Sony.Airplay / Chromecast – Use your iPhone/iPad to stream movies to your Apple TV or Android device to stream to Chromecast.4. What decisions do you support? Our movies are available to stream in 1080p HD quality. We also automatically monitor your internet connection and reduce the resolution of slower internet connections to ensure that the video always plays smoothly. On some devices/browsers, the Player supports selecting a specific resolution instead of relying on automatic adjustment.5. How does Flix Premiere determine the movie's maturity rating? Flix Premiere brings together lifetime ratings of movies based on country and region. The assessments are provided by a standardisation organisation that determines whether the material is suitable for children or not. If, for any reason, a film or other piece of content has not been judged by a known standardization organisation, Flix Premiere will use its reasonable assessment to determine whether the material is appropriate or not. Connect your devices to a TV.6. Can I use Flix Premiere on my Smart TV? Yes! We have an app available in stores on most Smart TV platforms. If our app doesn't support your specific Smart TV model, or if you don't have a Smart TV, there are other options for still watching movies on your TV that are available next time.7. How do I connect a Macbook/laptop to my TV? These days most laptops have a built-in HDMI port, which means you can connect it to your TV using an HDMI cable, the same type of cable used to connect a Blu-ray player or other. If you are using a Macbook, you may need to purchase an HDMI adapter for the mini-monitor port. Connect the cable to your laptop and TV. Use the tv remote to change the input to the HDMI port you inserted the laptop into. If your desktop doesn't appear on your TV, look for the function key at the top of the keyboard with a two-screen image and tap it until the desktop appears on your TV. You may need to hold down the Fn key while pressing the function key. Use Flix Premiere normally, as you would on a laptop.8. How do I connect an iPhone/iPad to my TV? To connect a mobile device to your TV, use a Digital Lightning AV adapter and an HDMI cable, the same type of cable used to connect a Blu-ray player or another set-top box: Plug one end of an HDMI cable into the Lightning Digital AV adapter's HDMI port, and the other in an additional HDMI port at the back of the TV. Connect the Lightning Digital AV adapter to the port of the iPhone/iPad used to charge the device. Use the TV remote to change the input to the HDMI port you've connected your laptop to, and you'll see the iPad or iPhone's home screen appear on the TV. Use the Flix Premiere app from the App Store or flixpremiere.com with your device's browser to find the trailer/movie you want to watch. Start playing the trailer/movie on your device, the Start screen disappears from the TV, and the video plays in full definition. The device displays a screen that says the TV is connected.9. How do I use Airplay with my Apple TV? When Apple TV is connected to your TV, select the appropriate input on your TV and make sure the Apple TV home screen is displayed:Connect your iPhone or iPad to the same Wi-Fi network as Apple TV. Start playing a Flix Premiere video (trailer or movie) on your device using the Flix Premiere app or by flixpremiere.com with your mobile browser. When the video plays, swipe up from the bottom of the screen to view the control center (you may need to swipe twice). Tap the AirPlay icon and select Apple TV. Tap outside control center to remove it, and tap Play to continue watching the movie. For more information about using AirPlay, visit Premiere Billing.10. How does Flix Premiere charge my account? Flix Premiere is a subscription service. When you sign up for one of our packages, you will be charged the original fee immediately and then with the range of the plan you chose on the same day. For example, if you have selected the monthly package on June 6, 2015, you will be entitled to a monthly package. Some packages offer a free trial. If you choose such a package, there will be no initial charge. If you do not cancel your subscription before the trial expires, you will be charged at the subsequent interval associated with the plan.11. Can I cancel my subscription at any time? Yes. It is free, and you can unsubscribe at any time. You will still have access to all movies in the current period you would have already paid for.12. Is my credit card information stored and how is it used? When you sign up for a subscription package, your credit card information is linked to your account. Your card will only be charged at the interval of the package you selected for the associated amount. There will be no hidden fees or unexpected fees. When you add a new card to your account without making a payment, we'll send an authorization to your financial institution to verify that your payment method is working. These requests are not fees.13. Is my credit card information secure? Yes, we do not store your card information on our servers at all, but rather pass it on to Stripe, a fully PCI DSS-compliant payment provider. Stripe gives us a unique token associated with your card that we used to initiate future purchases on your card through them.14. What currency will I be charged in? Purchases made by credit card will be charged in the currency of the country where the purchase was made. Flix Premiere is currently available in two areas: the US, where the fees are in USD, and the United Kingdom, where the fees are in GBP. Purchases made through the Apple App Store, Roku app or Amazon app will be charged in the currency associated with the Store account used to log into the device, regardless of the area where the purchase is made. FOLLOW US Page 2 FOLLOW OS Safe to DownloadSTE Primo and the download link to this app is 100% secure. The download link to this app will be redirected to the official App Store site, so the app is original and has not been modified in any way. Got it You cannot perform this operation at this time.
